

What's Up In The Sky?

words & music by
John Dandrea

**What's up in the sky,
higher than clouds, higher than high?
what's up in the sky,
higher than birds are able to fly?
if I had my own set of wings, I think I'd see
it's more fun to fly, and up in the sky
that's where you will find me**

**what's up in the sky,
bluer than blue, till it is night
what's up in the sky,
now that the stars are passing us by?
if I had my own set of wings, I think I'd see
it's more fun to fly, and up in the sky
that's where you will find me**

**and if - I close my eyes
and wonder, what's up in the sky?
I'm happy I've found,
my feet are still right here, on the ground**

**What's up in the sky,
higher than clouds, higher than high?
what's up in the sky,
higher than birds are able to fly?
if I had my own set of wings, I think I'd see
it's more fun to fly, and up in the sky
that's where you will find me**
